### CAMS

- Developed a web app to manage students' continuous assessments efficiently.
- Gathered information from lecturers which helped me understand how students' continuous assessment is computed and recorded.
- Motivated to solve some of the problems of the conventional (paper-based) assessment process by not just developing a web app but an archive where records can be retrieved with a single click.
- Utilized: PHP (Laravel & Livewire), JavaScript, HTML/CSS, MySQL, Heroku.
